

SYED MUHAMMAD MINHAL ABBAS RIZVI

AI Operations | Project Management | SaaS Operations | Technology Implementation | Cross-Functional Coordination

Virginia, USA | minhalrizvi122@gmail.com | linkedin.com/in/minhal-rizvi122/ | Portfolio: minhal-coding.github.io/my-portfolio

PROFESSIONAL SUMMARY

Computer Science student with a 4.0 GPA and hands-on experience across AI operations, SaaS implementation, project coordination, workflow automation, business operations, client communication, and international leadership. Able to translate business problems into structured workflows, AI-enabled systems, product requirements, operational processes, and practical automation opportunities. This is a general CV for broad opportunities; role-specific CVs can be tailored for each application.

CORE SKILLS

Project & Operations: Project coordination, implementation planning, process improvement, operational reporting, change management, distributed team coordination	AI & Automation: AI agent design, workflow automation, AI-assisted outreach, process documentation, scalable operating systems, Python automation, scraping workflows
SaaS & Client Success: SaaS onboarding, CRM workflows, stakeholder communication, technical-to-business translation, product implementation, support operations	Tools & Platforms: ChatGPT/GPT-5, Codex, Claude, Cursor, Zendesk, Notion, Monday.com, n8n, Miro, Canva, Apollo, LinkedIn Sales Navigator, Python, AWS fundamentals

PROFESSIONAL EXPERIENCE

Co-Founder & AI Operations Coordinator | EasyTodo LLC

United States / Europe | Jun 2025 - Mar 2026

- Co-founded and helped shape an AI-focused productivity and operations platform supporting workflow automation, task management, accountability, and operational visibility.
- Coordinated product strategy, SaaS workflow architecture, feature planning, documentation, stakeholder communication, Zendesk support workflows, and U.S. market positioning.
- Translated technical systems into practical business workflows for teams, managers, clients, and non-technical stakeholders.

Founder / Operations Builder | YAM Estimation, YAM Tech & YAM Design

International operations | 2024 - 2026

- Built and supported a multi-division operational ecosystem across construction estimation, design, digital marketing, technology, AI operations, and U.S. expansion.
- Supported growth from \$30,000+ early revenue to \$150,000+ across 2025-2026 while participating in 30,000+ estimation and design-related projects.
- Coordinated international client communication, workflow management, contractor coordination, Texas office setup, multi-state structuring support, and distributed team execution.

Technology Implementation & Client Success Coordinator | Growmatic

SaaS and operational software environment

- Supported SaaS onboarding, implementation coordination, client communication, product adoption, and stakeholder management for CRM, gym management, LMS, dashboards, and digital management systems.
- Acted as a communication bridge between technical teams and non-technical clients by translating software workflows into clear business language.

Co-Founder, Team Lead & Operations Coordinator | Best Solution Leads

Lead generation and business operations

- Built foundational experience in lead generation, data operations, LinkedIn/Apollo/Google Maps research, Python automation, scraping systems, and AI-assisted business research workflows.
- Led workflow tracking, reporting, delegation, accountability systems, operational visibility, and automation-supported execution across business development projects.

Operations Exposure & Business Systems | JL Group of Companies

Startup and business operations environment

- Gained early exposure to company workflows, offshore business management, client-facing systems, project environments, operational execution, and scalable process thinking.
- Developed a foundation in workflow automation, SaaS ecosystems, AI product systems, project coordination, and cloud-oriented operational systems.

Entrepreneurship & Brand Building | DanisApparels

Early entrepreneurial venture

- Built early experience in customer experience, brand identity, social media campaigns, marketing execution, visual communication, business discipline, and operational consistency.

COMMUNITY WORK

Community Volunteer, STEM Program & Technology Support | BabyScientists Inc.

Virginia, USA | Dec 2024 - Dec 2025

- Volunteered with a STEM nonprofit serving underserved K-12 students through workshops, classroom technology, website systems, registration workflows, outreach, summer camp support, and nonprofit operations.
- Strengthened community leadership, mentorship, service-based communication, technology support, and education-focused operational coordination.

EDUCATION

Associate of Science in Computer Science | Northern Virginia Community College

Virginia, USA | Jun 2025 - Present | GPA: 4.0

- Presidential Scholar recognition for Fall 2025 and Spring 2026; Dean's List recognition for Spring 2025.

- Student Ambassador supporting orientations, campus events, student engagement, mentoring, Canvas/SIS/myNOVA guidance, and academic systems navigation.
- Relevant coursework includes Data Structures & Algorithms, Object-Oriented Programming, Discrete Structures, Public Speaking, and College Composition.

LEADERSHIP, CONFERENCES & RECOGNITION

- Best Diplomats United Nations Simulation: Represented Malaysia in New York City diplomatic negotiations focused on SDG 5, SDG 16, peace, justice, and humanitarian collaboration; helped establish WAVE and contributed to a resolution that passed with 28 of 31 votes.
- CES 2026: Built exposure to AI, cloud, SaaS, robotics, enterprise systems, startup ecosystems, operational automation, and global technology innovation.
- Plus Summit 2025: Networked with leaders and professionals from seven countries around entrepreneurship, innovation, technology, leadership, and business growth.
- Honors and involvement: Phi Theta Kappa Honor Society, NOVA Student Ambassador, leadership and negotiation recognition, public speaking, institutional networking, and international conference participation.

AI SYSTEMS CAPABILITY

Able to define business problems, map workflows, design AI agent behavior, connect agents to documents/messages/tools, and use modern AI tools to support operational execution. Practical exposure includes Codex, Claude, ChatGPT/GPT-5, Cursor, Llama, MidJourney, AI research tools, and AI-assisted productivity platforms.
